

eLearning:

Quick Start Injection Molding

target user entry level beginners
development / sales / purchasing /
administration / production / quality

required knowledge none

start date immediately
at www.tech2know.de

what is „eLearning“ maximum flexible and attractive:

- ✓ you work on your course self-determined, at your individual speed
- ✓ you work with the content at any time, from any place and always actively
- ✓ you have questions - the experienced Tech2Know support has the answers

content

- chap. 1: Introduction: Plastics & Plastics technology
- chap. 2: Injection molding introduction: Machine & Process
- chap. 3: Introduction: Mold technology
- chap. 4: How the plastics melt flows: Injection phase
- chap. 5: How the molded part is formed: Solidification phase
- chap. 6: How is the molding process set up?
- chap. 7: Typical injection molding defects
- chap. 8: Design principles for molded plastics parts
- chap. 9: Summary & Technical terms
- chap. 10: Final test

work effort completely individual - you have 90 days to complete the training and work at your own pace
plan on about 40 - 60 min. per chapter

certificate after successful completion of the training and the final test
you will receive your certificate

booking use the QR-Code for booking

fee € 590,- excluding VAT

Quick Start Injection Molding

method

This eLearning is designed as a self-study course and is attractively presented in terms of media. A permanent alternation of text, image and video information ensures excitement and makes working with the learning content interesting.

Great effort is put into a clear explanation of the content as well as to didactically meaningful repetitions. Through intense interactions and regular quiz questions, learners work much more actively with the content than in conventional seminars or trainings.

Additionally, they receive continuous feedback on their learning progress. This strengthens their motivation to keep at it and thus promotes a lasting learning success.

For groups, the combination of self-learning courses with workshops in a hybrid learning process is recommended. Feel free to contact us!

value for companies

- save time, costs and personnel absence
- acceleration of onboarding processes
- increasing efficiency through sustainable effectiveness of the learning method
- flexibly compatible with home office, shift work or short-time work
- remarkable impact on your daily business
- **save twice: book contingents of courses**

benefits for participants

- start your training immediately, without waiting
- learn flexibly and actively, when & where you want
- use any internet-enabled device
- work at your own pace
- repeat content as often as you like
- pause your course at will and continue seamlessly
- ask your questions in the chat
